RECOMMENDATIONS BEFORE BUYING
A FRAMELESS GLAZING SYSTEM.

because we love expanding spaces...

www.c3systems.es

Introduction

The current design of buildings whether it be residential, commercial or industrial is based on functional factors and appearance.

The use of glass as a building material is becoming more and more in demand every day among architects and interior designers. Only glass can combine beauty, durability and transparency while fulfilling modern design requirements.

No doubt the use of glass in façades increases the feeling of open space, brings light inside and fits in perfectly with the surrounding environment.

Recommendations

We recommend that you **NOT BUY** frameless glazing systems from manufacturers or companies that do not certify their origin, quality, product testing, documentation, CE marking, etc. or companies that advertise on internet or catalogues where pictures and details of the system, original documentation, Legal Notice on web site, address, company name and other relevant details are NOT provided.

C3 Systems is from the very beginning, **the same and the only company** that guarantees the quality of their products. Other companies use multiple companies and brands at the same time to confuse the end consumer.

ATTENTION: do not accept imitations or copies. Make sure that the product you are buying is 100% seeglass. Demand the corresponding documentation, Product Guarantee, Use and Maintenance Manual, Product certifications and Tests.

Why seeglass?

15 YEARS GUARANTEE

seeglass is a high quality frameless glazing system. This allows us to offer up to **15 years guarantee**.

MADE IN SPAIN

seeglass **is entirely produced in Spain**. The facilities where C3 Systems products are manufactured are specially prepared to apply strict quality controls in order to offer a product 100% guaranteed.

CE MARKING

seeglass has **CE marking**. Our products are properly identified, tests are assigned and the certification process is endorsed by declaration of conformity duly signed and stamped.

Why seeglass?

CERTIFIED QUALITY
