Glass thickness	10 mm.
Types of glass used	Tempered.
Panel retaining	Squeezed and glued. Guaranteed.
Type of opening	Sliding and folding.
Colors available	Ral and wooden imitation.

Folding panels enclosure seeglass-big

Seeglass BIG is a glass enclosure with glazing and folding panels, whose main feature is the lack of a lower profile. This particular feature allows a new brand of systems specially designed to divide public spaces such as restaurants, offices, shops...

Thanks to the specially designed highly resistant hinges, and the advanced system of pane retainers, we can produce enclosures as high as 3,5 meters, making Seeglass Big the enclosure for the highest open spaces in seeglass brand.

Simple latches are used for anchoring sliding panes into the ground so the installation can be performed without any additional reforming.
